

WOODNATURE **BLINDS**

INTRODUCTION AND OVERVIEW

Introduction

WoodNature Blinds provide a practical alternative to timber blinds.

WoodNature Blinds provide the look of real wood with the quality and durability of advanced technology that is resistant to discolouration and warping.

Available in 3 plain colours in 50mm and 63mm slat and 5 wood look colours in 50mm and 1 in 63mm.

WOODNATURE FEATURES & BENEFITS

Performance

WoodNature Blinds are made from polystyrene which provides resistance to fading, cracking and peeling, allowing the blinds to be used in areas with high humidity, high temperatures and direct sunlight. All characteristics of a typical Australian Window.

Low Maintenance

The slats can be easily wiped clean with a damp cloth and unlike real timber, there is no need to re-stain the slats, making this a low maintenance product for years to come.

Light and Privacy Control

Whether you want privacy or to allow filtered light through, WoodNature Blinds give you complete control over the amount of light you let into the room. The beautiful curved shape Valance that is 90mm wide hides all your hardware and eliminates light gaps.

Uniform Appearance

WoodNature Blinds have been developed to capture the real look of wood and to eliminate any inconsistencies with colour, grain and pattern that you might traditionally find with real timber. This consistent wood look gives the blinds a more uniform appearance.

WOODNATURE CARE & CLEANING

General Care:

Remove dust with a light feather duster. Do not scrub.

Stains:

Clean with sponge dipped in soapy water. Leave blind closed until completely dry. Do not use Gumption, Jiff or any other abrasive cleaning products.
